CLASS DESCRIPTIONS

321 Fitness Challenge

This class has 3 components - cardio fat blasting, strength and conditioning using small weights and body weight resistance, followed by core stability. This class will boost your CV fitness, and strengthen and tone your body.

Active Body Shred

This class uses low-weights with high-reps, aimed at burning calories and defining muscles. It includes a high intensity cardio section, followed by 30 minutes of legs, arms, abs and back to ensure you achieve a whole body workout.

Ashtanga Yoga

This powerful form of Yoga has an emphasis on strength and stamina through energetic patterns of poses. Improve the body's flexibility, physical strength and muscular tone whilst calming the mind and improving circulation.

Boot Camp

A military-style class for strength and conditioning. The instructor pushes you to move onto the next exercise with very little rest in a circuit fashion.

Boxing Training

Learn the skills, the moves, the focus and the flexibility of boxing to assist weight loss, muscle tone and overall fitness.

Capoeira

A Brazilian art form which combines dance, rhythm with self-defence and movement. Aimed at enhancing your body's natural balance and control, whilst improving flexibility & coordination.

Chelsanity

A specifically formatted class of 20 second bursts of different ultra-intense exercises, repeated one after the other with only 10 second rests in between.

Combo Ballet Barre

A fantastic way to tone your body. Fun ballet-inspired workouts target and isolate small postural muscles through a combination of styles including Yoga and Pilates.

Dance Fitness

Fitness-based dance includes a warm-up, dance routines to popular and upbeat music that get the aerobic system going and target specific areas for burning calories and toning.

Elite Cycling / Treadmill

Designed to optimise your performance with two separate classes - Elite Cycling to build endurance power and Elite Treadmill to challenge with sprint intervals at level 10 or above.

Hatha Yoga

This slower paced and more gentle form of yoga is great for beginners. Build your flexibility over time while focusing on your breath.

HIIT / HIIT – Leg Day

Increase your capacity for high-intensity exercise. HIIT offers a longer "after burn", helps maintain muscle mass while still burning calories and enhances performance in sports and athletic activity.

Indoor Cycling

A great cardiovascular workout, find your groove and pedal through hill climbs, sprints and many other challenging drills. Ride to uplifting music and sweat it all out with this inspiring indoor cycling ride!

Interval Cycling

Get your heartrate elevated with this intense calorie-burning class. A sure way to stay in shape and keep your heart healthy as you ride on the heels of your instructor through flat terrain and bursting up mountain peaks.

Kundalini Yoga

This form of Yoga incorporates movement, dynamic breathing techniques and meditation. The goal is to build physical vitality and increase consciousness and this is achieved through chanting of mantras.

Power Aqua

Get out of the gym and into the pool! This class sculpts different areas of the body with no impact on the joints.

Pure Mat Pilates (Beg) / Mat Pilates (Int & Adv)

Aimed at helping to strengthen and tone with low-impact. Emphasis lies on spinal and pelvic alignment, breathing, developing a strong core and improving coordination and balance.

Pure Reformer (Beg) / Pilates Reformer (Int & Adv)

Our beginners workout is based on the reformer beds with a focus on learning specific techniques to isolate muscle groups and activate them correctly at a gentler pace. Master core strength and technical capability in Pure Reformer to reach intermediate level, before maximising your experience in the advanced reformer classes.

Bounce & Burn

Bounce & Burn is a full body workout, but low impact and de-toxifying form of exercise. Rebounding is jumping on a specialised, mini trampoline, aimed at aerobic and core fitness, improving the body's natural ability to heal itself, helping burn calories and improve circulation.

Strength & Cycle

Hard cycling through various intervals to develop your speed and ultimate cycling power. Powerful and effective exercises help blast and build whole body strength.

Swimsanity

Developed in London, the Swimsanity workout utilises inter-changeable drills, which gives participants an effective, mixed ability, aqua-exercise experience every time.

Table Tennis (not a class)

Play table tennis without interruption in studio space between classes.

Pilates Tower*

Through a system of springs and bars, the combination of Tower and Reformer equipment gives you one of the most effective workouts. The system supports the body to ensure proper stabilisation and positioning whilst providing added weight resistance from the springs for strengthening, toning and lengthening muscles.

Vinyasa Yoga

This type of aerobically vigorous yoga is flowing and continuous. The movement is smoothly synchronized to the breath and the poses run together, re-energising your body and mentally relaxing your mind.

Zero Gravity Yoga

With the weight of the body supported, learn how to achieve proper postural alignment through relaxation rather than effort, producing a peaceful state of mind.
